Keshav Jha

SDET with 4+ years of experience in all layers of quality engineering with strong automation as well as functional knowledge .Skilled in Java, Selenium, Appium, REST Assured and JMeter

WORK EXPERIENCE

MediBuddy (July 2021 - Present)
SDET-I

- **Worked** on key areas like corporates using Java with Selenium & BDD Cucumber Framework
- **Created** Test Plans, Cases and Scripts for UAT, functional and regression testing.
- **Designed**, wrote, and executed test scripts for web UI using Selenium and Mobile Automation using Appium.
- **Automated** process of fetching the latest apk uploaded in browserstack and start executing the test cases.
- **Used** Jenkins and GitHub to streamline QA Automation.
- **Designed**, wrote, and executed test scripts for API using REST Assured and Postman.
- **Written** a script in postman to verify different images & products in all the pincodes available.
- **Worked** closely with application designers/developers to resolve documentation, design & functional issues with various applications.
- **Led** and **mentored** manual QA engineers to execute and analyse automation smoke and regression tests.

Key Achievement: Added test cases for **200+** corporates in web application.

OpenPlay Technologies (February 2020 - June 2021)
Associate QA Analyst

- **Analyzed** business requirements and functional documents,created the test strategy document that define the test environment,phases of testing,entrance and exit criteria into different phases of testing.
- **Defined** and analyzed the test requirements including test data,test environments based on the application functionality.
- **Involved** in writing Test Case by using Design docs and Acceptance criteria. Performed functional testing,regression tesing and End to End testing of the new releases in workplace management.
- **Performed** extensive Cross Browser Compatibility testing on various web browsers like Google Chrome,Mozilla Firefox and Microsoft Edge and also in Mobile browsers like Chrome and safari.
- **Drafted** Test Plan which included testing objectives,testing phases,scenarios and test environment after a thorough analysis of the business rules.
- **Aggressively** pursued the resolution of high level defects in the project to facilitate smooth functioning of the test execution.

Key Achievement: Slashed testing time by **70%** by creating automation scripts using Selenium.

Amazon (July 2018 - August 2019)
Machine Learning Data Associate

- **Worked** towards enhancing the Response Delivery of Alexa AI (Virtual Personal Assistant) by Validating the correctness of data and by interacting with alexa app.
- **Verified** high priority deliverables.
- **Mentored** new team members for the job role.
- **Worked** with internal customers like ML data scientists by providing data required to improve Alexa's automatic speech recognition, NLU models and domain features.
- **Involved** in alexa device testing,data creation, curation and analytical services to help develop, test and train Alexa AI for English(US) language through alexa app and device.

Key Achievement: Contributed to process improvements to reduce **handling time** and **improve output**.

PROJECTS

Khelyaar (March 2020 - June 2021)
Online Fantasy Cricket

- Project Description : It is the Online Fantasy Sports site.
- Environment : Native Apps.
- **Responsibilities:** Requirement Analysis (Involved in meeting with Project manager and delivery manager).
- **Create** Test Plan, Resource plan, Preparation for test case, Preparation, Modification and Testing Activity.
- **Involved** in manual test execution and involved in various testing phases. Sanity, Functional, Regression, Usability and E2E etc

Becurie (July 2020 - January 2021)
Bluetooth Device

- Project Description : It is Device for listening music and it is connected with the App through bluetooth .
- Environment : Native Apps.
- **Responsibilities** : Requirement Analysis (Involved in meeting with Project manager and software developers).
- **Create** Test Plan , Resource plan ,Preparation for test case , Preparation, Modification and Testing Activity.
- **Involved** in manual test execution,App and device integration and involved in various testing phases. Sanity, Functional, Exploratory ,End To End and Usability.
